WORK EXPERIENCE

Halalbooking

Lead developer

February 2024 – Present

Freelance project

- Implementing **AI powered newsletter** translations with editable structured prompts backed by a glossary for higher quality translations. LLM model agnostic with detailed observability.
- Baking decisions and architecture for areas of my expertise into custom **coding AI agent skills**.
- **Leading large migration** of legacy frontend to a streamlined Hotwire powered setup.
- **Tackling tech debt** and improving long term maintainability for more effective development, primarily through migration to Hotwire and by simplifying backend code where necessary.
- Technical migration of corporate blog from an external solution to an embedded blog powered by a headless CMS. Setting up architecture, resiliency, observability and cross department flows.

Master Hotwire

Author and self publisher

January 2024 – January 2026

Personal project

- **Authoring and self publishing** a book about Hotwire: “Master Hotwire”.
- Doing all aspects: research, writing, organising beta reading, integrating payment and marketing.
- **Distilling the content of the book** into reusable AI agent skills.

Silverfin

Technical team lead

October 2019 – July 2023

Freelance project

- Leading development and modernization of a vertical slice of Silverfin functionality: primarily automatic reports, the oldest functionality in the app.
- Owning the technical aspect of that area, leading a small team of developers and making sure they are productive and engaged in the work.
- Balancing development of new features with refactoring of old functionality.

Silverfin

Senior Software Engineer

September 2018 – October 2019

Freelance project

- Ruby on Rails and PostgreSQL development, primarily in the accounting data ingestion and processing part of the product.
- Improving **maintainability and robustness of pipelines** for ingesting accounting data from many 3rd party providers.

Hippo Technologies

Technical team lead

January 2018 – September 2018

Freelance project

- Coaching current team leads within the company.
- Optimizing processes and efficiency of the whole engineering department.
- Spending 50% of the time implementing features through the whole stack.

Toptal LLC

Technical team lead

April 2015 – December 2017

Freelance project

- Technical and product lead for a team of 7 cross-functional developers.

- Managed the full replacement of an external meeting scheduling tool with a more powerful internal solution by filling a dual role of technical team lead and product manager. Gathered requirements, created a product roadmap and oversaw the entire technical implementation, contributing many critical low level pieces of code.
- Worked on building, from scratch, an internal BPM solution, first as an engineer and later as a technical team lead. Implemented proper Kanban practices and worked with the team to resolve internal conflicts and double team velocity within 6 months of taking leadership on the project. Contributed key pieces of engine code.
- Conducted over 200 candidate interviews for backend developer, team lead and engineering manager positions.

Toptal LLC

Senior Software engineer

September 2013 – April 2015

Freelance project

- Implemented vertical slices of functionality with follow-ups based on feedback.
- Worked as the only backend developer with a team of frontend developers to ship a complete public website redesign, including refactoring large parts of the backend.
- Implemented most of the API backend, parts of a single page React based frontend application and the desktop component of the TopTracker application.
- Conducted large scale refactorings and improved performance of critical pieces of Toptal's main product.

Labtiva Inc.

Software engineer

November 2011 – September 2013

Freelance project

- Full stack development of the primary product, ReadCube.
- Taking care of all aspects of introducing features, from requirements to deployment.

Drap d.o.o.

Programmer and Project Manager

November 2009 – November 2011

Zagreb, Croatia

- Full stack development and production servers maintenance on Amazon AWS and Heroku.
- Responsible for technical direction within the company.

Drap d.o.o.

Programmer

2008 – 2009

Zagreb, Croatia

- Implemented Facebook applications with Ruby on Rails.

Urban Jungle

Core programmer

2003 – 2005

Personal project

- <http://uj.dir.hr>: award winning 3D educational software built with Delphi and DirectX.

EDUCATION

University of Zagreb, Faculty of Natural Sciences – Mathematical Department

2003 – 2009

dipl. ing. of Mathematics, equivalent to Masters in the Croatian education system; Mathematical Engineering degree.

Forest School, London

2001 – 2003

A-Levels: Maths, Physics, Chemistry, Informatics.

High school of Andrija Mohorovičić, Rijeka

1999 – 2001

30x500 course by Amy Hoy and Alex Hillman

2023

A comprehensive private course on understanding your audience and their pains. Learned about crafting and launching useful and effective solutions that address audience pains.

Andrew Ng's Coursera Deep Learning specialization

2017

Completed the specialization on **deep learning**, neural networks, and AI development.

TECHNICAL STRENGTHS

Mathematics applied to software
3+ years production experience
Best at
Methodologies
Learning

My mathematical engineering background underpins my software engineering work
Ruby, Ruby on Rails, PostgreSQL, JavaScript, MySQL, Backbone.js, AWS, DirectX
Ruby, Ruby on Rails, PostgreSQL, JavaScript
Agile, Scrum, Kanban, Pair programming, TDD, BDD, Prototyping, Usability testing
Elixir, Clojure, Machine learning

ACADEMIC ACHIEVEMENTS

2009 Finished university with highest overall grade within top 10% in my year.
2002 Came 6th in the UK national programming competition to select the UK IOI team.
2001 Won Bronze Medal at the Central European Olympiad in Informatics.
2000 Accepted to Mensa.

PROFESSIONAL INTERESTS

I especially enjoy taming complexity related to business rules. Unlike natural rules, business rules are made up and often have inherent complexity, coming from the fact that they may not be internally consistent. I enjoy extracting proper underlying domain definitions and reflecting them correctly in code structure.

OTHER INTERESTS

Real time 3D computer graphics, Mathematics, Logic, Marathon and Trail Ultra running, Hiking, Sailing.
